

RELIABLE & ROBUST

As the Quality Control Manager Bo Bossen supervises product purchasing at FORCE Technology. He is a Level 3 Inspector and has been using YXLON Copenhagen's portables since 1994. FORCE Technology is the largest inspection company in Scandinavia. They were founded more than 70 years ago - and operate worldwide from America to Asia.

"YXLON PRODUCTS ARE RELIABLE AND ROBUST"

FORCE TECHNOLOGY IN BRØNDBY, DENMARK.

The weight of the portable X-ray tube heads is sometimes up for debate. "We have tried most competing tube heads, but even though some are lighter than YXLON's, they all have significant drawbacks. YXLON Copenhagen's tube heads don't have radiation leakage problems, and they are very robust." The protective radiation-proof padding makes the products safe and robust.

Reliable products are essential for running a successful business. "We need to have reliable equipment; we can't afford to bring unreliable equipment on a job. It would be costly, time consuming and unprofessional. We have fully operational YXLON equipment dating back to the early nineties." Twenty years of operation makes the total cost of ownership very low.

YXLON equipment is used for all types of inspection jobs, ranging from lab mounts to manholes. They are handled by real workers and are used for real work. Bo elaborates: "The environment is often rough, and so is the handling. Quite often the tube heads get a few bumps on the way, but they can take it. YXLON products are reliable and robust."
